For Users:

PR #6 FEATURE: Implement the GeneralEducationSearchPage

We added a GE Search feature where users are able to search up GEs based on quarter+year and the GE area.

Before

GE Search coming soon!

Quarter	Course Id	Title	Description	General Education Areas
M24	ANTH 2	INTRO CULT ANTHRO	The nature of culture: survey of the range of cultural phenomena, including material culture, social organization, religion, and other topics.	NWC, D, D, NWC
M24	ANTH 2	INTRO CULT ANTHRO	The nature of culture: survey of the range of cultural phenomena, including material culture, social organization, religion, and other topics.	NWC, D, D, NWC
M24	ANTH 3SS	INTRO ARCH	Introduction to archaeology and the prehistory of humankind from the earliest times up to the advent of civilization and cities, also processes of cultural change.	D, NWC, D, NWC
M24	ANTH 109	HUMAN UNIVERSALS	A critical overview of those characteristics of human psyche, behavior, society, and culture that are allegedly found among all peoples: the constants of human nature.	D, D
M24	AS AMW 1	INTRO AS AM HISTORY	Historical survey of Asian Americans in the United States from 1850 to the present. Topics include: Immigration patterns, settlement and employment, race and gender relations, community development, and transnational connections.	D, ETH, D, ETH, ETH, AMH
M24	CH ST 1A	INTRO CHICANO/A STD	Introduction to the historical and contemporary development of the Chicano/a community. Course is interdisciplinary in nature. Focuses by quarter on A. history, B. gender, and C. culture.	AMH, ETH, ETH, ETH, WRT, WRT, D, D

PR #29 feat: improve Downloads page with dropdowns and checkboxes

This PR improves the CSV Downloads page by replacing free-text fields with existing reusable dropdown components and exposing the additional backend parameters for the quarter + subject CSV download endpoint.

API for course data as CSV downloads

GET

/api/courses/csv/quarter

Download Complete Course List for a quarter as a CSV File

GET

/api/courses/csv/byQuarterAndSubjectArea

Download Course List for a subject area and quarter as a CSV File

Returns a CSV file as a response

Parameters

Try it out

Name	Description
yyyyq required string (query)	quarter in yyyyq format Example : 20261 20261
subjectArea required string (query)	subject area Example : CMPSC CMPSC
level string (query)	U for undergrad, G for graduate, A for all (default: U) Available values : A, U, G --
omitSections boolean (query)	omit sections Default value : true Example : true true
withTimeLocations boolean (query)	return only courses that have times and/or locations assigned (e.g. no independent study type courses) Default value : true Example : true true

Responses

PR #22: Create user friendly error page

We created a custom user friendly error page instead of the default Spring Boot white label error page. Now when the backend error occurs, users can see a clearer error message instead of

default.

Oops! Something went wrong.

We are sorry, but the application encountered an unexpected error.

Status: 500 - Internal Server Error

PR #23: Added Summer Session Column to Course History

Previously, when users searched for courses in Course History Search, summer courses did not clearly show which summer session they belonged to. This made it harder to tell whether a summer course was part of Session A, Session B, or another session. This PR adds a new Session Column to the Course History Search results. For summer courses, the table now shows the session letter, such as A or B. For non-summer courses, the column is left blank.

PR #19: Add loading state message and “no result found” message for all searches.

Previously when users initiate a search that returns no result, there’s absolutely no feedback at all, and it looks exactly like if the search is never initiated or failed. This PR adds the message indicating the search returns no result as well as if the search result is still loading, so that the user knows how the search goes.

PR #27 Added frontend pagination

Added frontend pagination to the Admin Users page. The page now calls the existing paginated `/api/admin/users` backend endpoint with `page`, `pageSize`, and `sortDirection` parameters, then renders only the current page of users instead of loading and displaying all users at once.

This update adds the shared `OurPagination` control to `/admin/users`, displays paged user results via `page.content`, and updates tests and Storybook mocks to use the paginated response shape. When there are more than 10 users, admins can navigate between pages of users.

PR #48 Add EnrollmentHistoryGraph into CourseDetailsIndexPage

In this PR, we added EnrollmentHistoryGraph to the Course Details Index Page. Now when the user visits the page, not only do they see Course Description, they can also see the enrollment history of the course based on dates.

Course Description

Advanced application programming using a high-level, virtual-machine-based language. Topics include generic programming, exception handling, automatic memory management, and application development, management, and maintenance tools, third-party library use, version control, software testing, issue tracking, code review, and working with legacy code.

Enrollment History

PR #23 Add summer session column to course history

In this PR, we added the option to have a summer column to show summer session courses. It lists out which session it's on, and for regular session courses it's left blank

PR #26 Add Course Description Search

We created the Course Description Search page. Users can search for courses across a quarter range using search terms that match the course title or course description. The page also supports the lectureOnly option, matching the behavior of the existing Course Over Time instructor search.

UCSB Course Description Search

Search for courses by entering terms that will be searched in the course title and description across a range of quarters.

For Developers:

PR #21: Improved Integration Test Start Time

This PR improves the developer workflow for running integration tests. It adds a new Maven integration profile that avoids reinstalling Node, npm, frontend dependencies, and rebuilding the frontend when the related files have not changed. It also moves the frontend Node version into one shared Maven property instead of hardcoding it in multiple places. This makes repeated integration tests runs faster and keeps the build setup easier to maintain.

PR #25: Derive END_QTR at startup from current quarter

Changed END_QTR so it is calculated automatically from the current UCSB quarter instead of being manually set in the environment. This makes deployment simpler because developers only need to configure START_QTR, and the app handles the correct ending quarter on startup.
